¹ As a (UK) producer of industrial batteries under the Waste Batteries and Accumulators Regulations 2009, we, Saft Ltd, produce industrial Ni-Cd and industrial lithium-primary batteries. We are obliged to take back free of charge, waste industrial batteries supplied to an end user for treatment and recycling. We are required to do this in any calendar year we place new industrial batteries on the market. If any of our customers or in certain cases other end users, require us to take back Industrial batteries, they should contact us at the above-mentioned phone number or e-mail address of the partner we have set up in the UK. We will agree through them the necessary arrangements for the return, proper treatment and recycling of the waste industrial batteries.
